

PlanO – Control & Compliance Mechanism (B)

This document defines how PlanO prevents abuse, enforces pricing discipline, and aligns incentives structurally.

1. Core Principle

Compliance is enforced primarily through access control and incentives, not litigation.

2. Access Gating

- Paid leads gated by compliance score
- Repeat clients reserved for high-compliance providers
- Material margin access conditional on behavior

3. Pricing Enforcement

- PlanO estimates are reference baseline
- Scope changes must be documented in-platform
- Off-platform undercutting triggers sanctions

4. Provider-Initiated Clients

- Providers may onboard their own clients via PlanO
- They receive a revenue share from the 5% commission
- Full compliance still mandatory

5. Monitoring Signals

- Estimate-to-conversion ratios
- Client cancellation patterns
- Repeated scope disputes

6. Sanctions Ladder

- Warning
- Access restriction
- Loss of vetted status
- Delisting
